NPIC Project J-190/63

photography of reveals a new airfield under construction 4.5 nm ESE of Kupyansk. Facilities include: a 7,800 x 140 foot north-south concrete runway, apparently complete; a parallel 40-foot wide concrete taxiway under construction, the north 3,500 feet of which appears complete; and three concrete connecting taxiways, each 650 x 45 feet, apparently complete.

Three possible permanent-type support buildings are under construction just west of the parallel taxiway, and a probable parking area is under construction along the west side of the taxiway. The construction support base and construction materials storage area are located immediately to the southwest of the airfield. The airfield is road served.
